You name it.
We weave it.

Griege & Finished Fabrics
Manufacturer & Exporter

For more than 2 decades, we have garnered an indomitable presence in the Grey Woven fabric manufacturing sector. By doing things repetitively, one tends to get good at what he/she does. Ours is a highly structured activity engaged with the specific goal of improving our performance in a certain area of our choice. We source quality Yarn from the most trusted sources to ensure the fabric gets woven efficaciously as per the precise specifications of the Customer. The company has groomed its expertise in weaving a variety of Grey Fabrics, and holds its Niche in the weaving of 100% Cotton Grey Fabric, 100% Organic Fabric, BCI Cotton, 100% Modal & Viscose Fabric, Stretch Fabrics and other filament Grey fabrics. Our Grey fabric repertoire are available in width ranging from 48" to 70" with the Weaving design that encompass Poplin, Plain, Percalé, Twill, Drill, Satin, Stripe Satin, Duck, Oxford, Canvas, Herringbone, Cambric, Dobby etc..

Our cloth is used by most of the reputed garments in India and we export to other clients in Asia also. We are currently operating at a Average Weaving capacity of one million meters per month.

The packaging of the Finished Greige woven Fabrics is astutely done in Roll form or Bale form as per the specific need of the customer.

Mission

To become one stop fabric sourcing destination with prime focus on fabric innovation and adaptability.

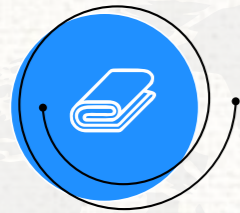

Vision

We see ourselves become a textile sourcing house with prime long-term focus on sustainable textiles, geo-textiles alongside woven fabric making competences.

We aim to advocate the make in India analogy through expanding export capabilities. The vision is to become an economic contributor for the country in our field of work..

INFRASTRUCTURE

MACHINERY

- In- house Air jet weaving facility in multiple width from 130-210 cm along with 200+ outsourced air jets and rapiers for production of more than 25 million square meters fabric/annum
- Tsudokoma ZAX9200i machine with 4 pick insertion, lycra attachments, rolling up to 600 meters with Dobby and Cam looms.
- Dobby looms with 16 shaft operations and Cam looms with 8 shaft operations.
- We have an extensive roll-to-roll facility with cleaning and brushing where we can seamlessly perform rolling operations for 600-650 m in single piece.
- Multi-width weaving facility from 50"-82" along with leno/ fringe selvages.
- Yarn count range from NE 14-Ne 120
- Fabric range includes cotton, poly cotton, polyester, nylon, viscose across multiple weaves as per your demand.
- Fresh percentage for defect free fabric is 95%+
- Fabric production capacity for bulk export orders with faster turnaround time courtesy our trained staff and outsourced agencies for marketing, documentation and shipping.
